

Project Description:

Rento is a web-based rental platform designed to assist Egyptian university students in finding suitable accommodation near their universities. In many regions across Egypt, students face serious difficulties when searching for housing, including misleading listings, lack of reliable information, and rental fraud. These challenges make the process of finding a safe and affordable place to live stressful and time-consuming during the study period.

Project Purpose:

The main purpose of Rento is to connect renters (apartment owners) with student renter through a trusted and well-organized platform. The system enables students to browse available apartments, view detailed property information, and apply filters based on budget and required features such as location, apartment size, and available facilities. This helps students make informed decisions that better match their needs during the university period.

Innovative Aspects:

The innovative aspect of Rento lies in its focus on solving a real and widespread problem faced by Egyptian students. Unlike generic rental platforms, Rento is specifically tailored to student requirements, with an emphasis on budget constraints and feature-based matching. By addressing these student-specific challenges, the platform provides a practical solution that reduces housing-related risks and improves the overall student living experience.

User Personas

YA

Youssef Amer

The First-Time Renter

Age	23
Occupation	Junior software developer at a startup
Location	Moving from Alexandria to New Cairo

BACKGROUND

Youssef just graduated and is moving out for the first time. He has a tight budget and no rental history. He does everything on his phone.

GOALS

- Find an affordable furnished apartment near his workplace
- Understand the lease before signing — no surprises
- See real, verified photos before visiting

FRUSTRATIONS

- Scam listings with fake photos and outdated prices
- Landlords who stop replying after the first message
- Hidden fees only revealed at signing

PREFERRED FEATURES

- Map search with price filter
- Verified listing badge
- In-app chat with landlord
- Favorites list to compare options

SM**Sara Mahmoud**
The University Student

Age 20
Occupation 2nd-year Pharmacy student, Cairo University
Location Giza (looking near campus)

BACKGROUND

Sara travels 1.5 hours each way from her parents' home. She wants to rent a room close to campus with a friend to split the cost. First time renting — her parents are helping but she leads the search.

GOALS

- Find a shared 2-bedroom apartment within walking distance of campus
- Keep monthly rent under L.E 5,000 split between two people
- Find a safe, quiet building suitable for studying

FRUSTRATIONS

- Most listings are too expensive for a student budget
- Landlords who refuse to rent to students
- No easy way to search specifically for shared or furnished rooms

PREFERRED FEATURES

- Room-sharing / co-rent option
- Distance-to-university search
- Safety rating for the neighbourhood

KM**Khalid Mostafa***The Budget Family Renter*

Age	41
Occupation	Government school teacher, public sector
Location	Qalyubia, Egypt

BACKGROUND

Father of three on a fixed monthly income. He rents long-term and renews the same flat every year. He is not very tech-savvy but uses WhatsApp and Facebook daily.

GOALS

- Find a spacious 3-bedroom apartment under L.E 8,000 per month
- Renew his lease every 6 months without extra paperwork
- Get a reminder before rent is due so he never misses a payment

FRUSTRATIONS

- Unexpected price increases at renewal with no warning
- Sign-up forms that are too long and complicated
- App content shown only in English

PREFERRED FEATURES

- Arabic language support
- Payment reminders by SMS or notification
- One-tap lease renewal
- Price history to help him negotiate
